

JETHVA KARTIK

Python Trainee · Backend Developer · Web Developer

✉ kartikjethva0@gmail.com | ☎ +91 7863084523 | 📍 Kothariya, Rajkot, Gujarat

PROFESSIONAL SUMMARY

Passionate Backend Developer with hands-on experience building efficient and scalable web applications. Proficient in Python, PHP, HTML, JavaScript, MySQL, and PostgreSQL. Experienced across multiple internships in server-side logic, database management, and API development. Continuously learning new technologies to improve development skills and deliver clean, maintainable code.

CORE SKILLS & TOOLS

Python Backend	HTML(Basic) API Integration	JavaScript(Basic) GitHub	MySQL ChatGPT	Django AI Tools
-------------------	--------------------------------	-----------------------------	------------------	--------------------

★ **AI Tools:** ChatGPT, Google Gemini, Claude AI — used for code generation, debugging, and development acceleration.

WORK EXPERIENCE

Backend Intern | Ananta Technolab

2024 – Present

- Assisted in building and maintaining server-side logic, databases, and APIs for web applications.
- Worked with Python and managed data using MySQL and databases.
- Collaborated with frontend developers to integrate backend APIs and deliver complete web features.

HTML PHP Intern | Ethics Technologies

2023 – 2024

- Developed server-side applications using PHP and HTML to build simple, functional web platforms.
- Created and managed databases, handled form data, and connected web pages with backend logic.
- Gained practical experience with input validation, session handling, and clean code practices.

Python Backend Developer (Trainee) | Tops Technology

2025 – 2026

- Working on backend development using Python and PHP/HTML as part of structured professional training.
- Building and maintaining web applications, managing databases, and connecting backend logic to frontend interfaces.
- Applying best practices in backend architecture and strengthening skills across the full backend development lifecycle.

EDUCATION

Diploma in Information Technology Government Polytechnic Rajkot, Gujarat	2022 – 2025
Backend Developer Training Tops Technology, Rajkot	2025 – 2026

LANGUAGES

English (Proficient) | **Gujarati** (Native) | **Hindi** (Conversational)

ACHIEVEMENTS & EXTRACURRICULARS

- Completed Backend Developer Training at Tops Technology covering Python, PHP, MySQL, and web application architecture (2025–2026).
- Strong problem-solving skills demonstrated through multiple internships building real-world backend systems.
- Organized and detail-oriented professional with strong communication and teamwork abilities.
- Continuously self-learning new AI tools and backend technologies to stay current with industry trends.

KEY PROJECT

Notes App | Python, Django, SQLite/MySQL

- Developed a secure Notes Management Web Application using Django.
- Implemented user authentication (Login, Signup, Logout).
- Added CRUD operations for creating, updating, deleting, and viewing notes.
- Designed responsive frontend using HTML, CSS, and Bootstrap.
- Integrated database management with SQLite/MySQL.
- Implemented form validation and secure data handling.
- Followed MVC/MVT architecture and REST API basics.
- Used Git/GitHub for version control and project management.

Image to Prompt Generator | Python, Django, AI Integration

- Developed an AI-powered web application that generates text prompts from uploaded images.
- Implemented image upload, processing, and prompt generation features using Django.
- Designed a user-friendly and responsive interface using HTML, CSS, Bootstrap, and JavaScript.
- Added secure user authentication and image management functionality.
- Integrated AI tools/models for image analysis and prompt creation.
- Optimized backend performance for smooth and fast processing.
- Managed database operations using SQLite/MySQL.
